PROFILE

As a skilled Front-End Developer, I specialize in constructing user-friendly websites. Committed to ongoing professional development, I consistently enhance my skills to remain current within the field. My expertise in JavaScript, Vue.js and React.js enables me to develop outstanding projects, offering a seamless experience. Have the Adaptability and ability to learn quickly, to solve problems and have analytic critical thinking and also as a strong team player, I foster open communication and collaboration, creating synergies within diverse teams.

EXPERIENCE

Elektromarketim.com - Frontend Developer

03-2022 - 07-2023

Key achievements:

- Designed and implemented fully responsive, user-centric E-commerce and utilizing websites with Vue.js, Nuxt.js and JavaScript.
- Effectively improved overall SEO and user experience and optimizing website performance.
- Leveraged my in-depth knowledge of the used front end technologies to create robust, dynamic, and interactive UI components.

PROJECTS

NFT AND DIGITAL ART TRADING MARKETPLACE

Designed and developed an efficient, user-friendly trading platform utilizing modern web technologies, with a focus on responsive design and real-time functionality. The platform integrates dynamic, reusable UI components and a Stripe API checkout option.

Technologies : Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Stripe API.

INTERACTIVE ANALYTICS DASHBOARD SYSTEM

Built a comprehensive, aesthetically pleasing administrative dashboard using React and Tailwind CSS. The project exemplifies crafting complex UIs, adhering to best practices for accessibility, user experience, and performance in real-world applications.

Technologies : React, Tailwind CSS, react-apexcharts, postcss, Vite, webpack.

REAL-TIME MESSAGING APPLICATION

Engineered a dynamic, real-time messaging application, demonstrating complex application architecture. The project involved creating a user-friendly chat interface, managing user authentication, and developing message sending/receiving functionality.

Technologies : Vite, Vue 3 Composition API, Tailwind CSS, Google Auth, Node.js, Firebase.
